# Page Per Page Integration with Vantaca

Vantaca has the ability to have third party print houses print and send letters. One of the print house integrations available is Page Per Page. To use this integration, it will need to be marked 'active' in Vantaca under **Settings > Interfaces.** The Client ID will need to be entered on this screen as well and this number should be provided by Page Per Page.

Additionally, if you would like your homeowner and association information to integrate into Page Per Page, you will need to request API credentials by emailing Vendorsupport@vantaca.com. They will provide you with the credentials needed to enter into PagePerPage under **Integration Management.** This will create a PagePerPageUser in Vantaca for your database so please be sure to not delete or edit this user.

If you are sending coupons and statements to Page Per Page, you will need to update your settings in Vantaca under **Association > Settings**. From there, scroll to the **Interfaces** section and change the coupon and/or statement formats to Page Per Page.

Interfaces		
Sperlonga	Disabled	Edit
Coupon Format	Page Per Page	Edit
Statement Format	Page Per Page	Edit
Spectrum Accounting GL	(Choose an Account)	Edit
Statement Product Code - SD Only		Edit
AppLega AuthCode		Edit
AppLega AssociationID		Edit
AppLega Attorney Fee Charge Type		Edit
AppLega Attorney Cost Charge Type		Edit

You are now ready to send items through the Page Per Page integration. Once you have generated a statements or coupons action item and it is in the print queue, navigate to **Mailroom > Print queue,** select the items you would like to send, and select **Send to Page Per Page.**
